THE STATE'S FISCAL SYSTEM

A brief review of the State's fiscal organization and procedures is presented to facilitate understanding of this report and related records. The fund structure, the appropriation concept of legislative control and the meaning of various terms applied to fund balances are discussed in the following paragraphs.

THE FUND STRUCTURE

Funds are established jointly by the Comptroller and the State Treasurer pursuant to statutory direction or authorization. A fund is a segregation of cash and serves as a device to assist in maintaining control of the State's fiscal affairs.

Funds are classified in this report according to major purposes and sources. The General Revenue Fund supports all appropriations not specifically drawn against other funds. The Common School Fund is financed by revenue from sales taxes, bingo tax and by transfers from the General Revenue, Federal Fiscal Assistance and Federal Public Works Assistance Funds. These four funds are combined into a "General Funds" classification. The magnitude and importance of transactions from the highway funds justifies their inclusion as a distinct group.

Other groups of funds distinguished by their purpose or source of revenue are the university income funds, special State funds, bond financed funds, the debt service funds, Federal trust funds, State trust funds, revolving funds, and non-appropriated State and Federal trust funds.

Federal trust funds are generally reserved accounts of grants from the Federal Government, to be held by the State Treasurer in trust for specifically restricted purposes. The programs financed by these funds may or may not be appropriated and are segregated in this report as appropriated or non-appropriated.

Revolving funds are supported by expenditures from other funds, but are appropriated to give the administering agency the necessary spending authority from these revolving funds.

THE FLOW OF CASH RECEIPTS

Revenue must, with the exception of certain receipts, be deposited with the State Treasurer in accordance with statutory provisions. The revenues (other than currency) collected by State agencies are deposited in the Treasurer's "clearing account" for transmittal through banking channels. After the Treasurer receives credit from a depository bank, he issues a draft to the collection agency for the amount of the agency's deposit, less any checks returned. The collecting agency then requests the Comptroller to order the Treasurer to receive the amount of the draft, specifying the fund to be charged with the receipt, and the source of the revenue. The Comptroller prepares analysis of the sources of fund receipts.

TRANSFERS BETWEEN FUND BALANCES

Cash collections deposited with the Treasurer and any amounts transferred from other funds constitute resources available in an individual fund. Transfers are directed by the Comptroller, pursuant to requests specifically authorized by statute or in accordance with the general legislation delegating authority to an elected official.

Periodic transfers are the partial or sole support of some spending funds. Transfers are accomplished, usually, by the Comptroller and the State Treasurer through entries in the fund accounts. For example, cash receipts from the Motor Fuel Tax are cleared into the Motor Fuel Tax-Stat. Fund (a collection fund), and subsequently transferred into the distributive Motor Fuel Tax-Counties, Municipalities, and Township Funds, the Road Fund, the Grade Crossing Protection Fund and the State Boating Act Fund. Receipts of Federal aid for public aid are deposited in the Public Aid Trust Fund; amounts are transferred to the General Revenue Fund as reimbursement for expenditures from State sources of revenue.

The "Appropriated Funds" grouping in Table I of this report includes a few which, even though not appropriated, do provide support to activities financed by appropriated funds or are subject to appropriation. Transfers from the non-appropriated funds to appropriated funds increase the resources available to finance the State's programs. State funds - the General Funds group and special funds, including the highway group - are supported by revenue from State tax sources, with the following major exceptions. The General Revenue Fund is reimbursed for public assistance programs by transfers of Federal aid from the Public Aid Trust Fund, as mentioned above, plus minor amounts of Federal aid received directly. The Road Fund receives Federal aid for highway construction in the form of reimbursement paid directly into that fund.

CONTROL OF EXPENDITURES

Expenditures from funds are primarily controlled by Constitutional and statutory provisions requiring authorization in the form of legislative appropriations. Prior to fiscal year 1970, appropriations were made on a biennial basis, and the time period for which appropriations were available extended, unless specifically restricted, from the effective date of the appropriations act through September 30 of the next odd numbered year.

Effective in fiscal year 1970, the State Finance Act was amended to read "All appropriations shall be available for expenditure for the fiscal year or for lesser period if the Act making that appropriation so specifies. Deficiency or emergency appropriation shall be available for expenditure only through June 30 of the year when the Act making that appropriation is enacted unless the Act otherwise provides. Outstanding liabilities as of June 30, payable from appropriations which have otherwise expired, may be paid out of the expiring appropriations during the three-month period ending at the close of business on September 30 "termed the lapse period". At the end of the three-month lapse period, the unexpended balance of the appropriation is lapsed. The unexpended amounts required to complete construction projects under way at June 30 are usually reappropriated.

Legislative appropriations restricting expenditures are given some flexibility through statutory provisions permitting discretionary transfers from one appropriation to another for the same agency.

FUND BALANCES AND THE BUDGETARY BALANCE

Fund balances are differentiated as cash balances, available balances, and budgetary balances. The available balance at a given date equals the cash balance minus any warrants outstanding at that time. The Budgetary balance of a fund at the close of a fiscal year is the available balance less payments made during the ensuing three months (the lapse period) of obligations outstanding as of June 30.

TABLE I
FUND TRANSACTIONS - FISCAL YEAR 1978

All Treasury funds are listed in this comprehensive table.

The format of this table was revised in fiscal year 1977 to reflect total revenues and total expenditures, rather than budgetary receipts and budgetary resources. The Budgetary balance at June 30, 1977 plus total revenues constitute the total available for expenditure in fiscal year 1978 including the "lapse period", July 1 to September 30, 1978. The total available, as reduced by total expenditures in the twelve months of fiscal year 1978 and the warrants issued in the lapse period to pay fiscal 1978 obligations, equal the budgetary balance to begin the next fiscal year. The budgetary balance in several funds may be negative to the extent that warrants issued in the lapse period exceeded the available balance at June 30, 1978. The deficiencies in these budgetary balances are compensated by transfers or cash receipts during the lapse period.

Transfers between funds are listed in Table I-A

"Prior Year Adjustments" to warrants issued have been set out in a separate column and considered in arriving at the net warrants issued and net total expenditures for the fiscal year.

TABLE II
CASH RECEIPTS
APPROPRIATED and NON-APPROPRIATED FUNDS
for
FISCAL YEARS 1977 and 1978

The sources of cash receipts into appropriated (budgeted) and non-appropriated funds are set forth in this table.

The terms "Treasury Receipts" is no longer used in this table or in this report. That is, transfers from non-appropriated States and Federal trust funds to appropriated funds are no longer reflected. In previous years such transfers were presumed to increase the aggregate of receipts into appropriated funds and cash receipts into these non-appropriated funds were reflected in Table I.

All transfers between funds are specified in Table I-A of this report.
